

UI/UX exercise 01

PREPARED BY: WESSAM K. COMBAL

CV form

A training company is building a database of instructors to make it easier for them to find the right person to teach specific courses.

The company would like to design a web page so that instructors can submit their CV through the company's website. The captured information will be saved in the company's database, and the company will be able to browse through and filter the pool of CVs.

You are required to design a web page that has a registration form that contains the following data:

- First name - text
- Last name - text
- Email Address - email
- Mobile - text
- Gender - Dropdown menu with two options: Male and Female
- Nationality - Dropdown menu with nationality options (use 1 or 2)
- Photo - File input (browse to upload your photo)
- CV file - File input (browse to upload your CV)

The form should be clear, usable, and understandable.

Note: feel free to use whichever colors you see fit.
